***Election/Restriction***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a broad writing or erasing operation of a memory device, classified in class 365, subclass 185.22.
- II. Claims 11-14, drawn to a specific writing operation of a memory device, classified in class 365, subclass 185.28.
- III. Claims 15-18, drawn to a specific erasing operation of a memory device, classified in class 365, subclass 185.29.

The inventions are distinct, each from the other because:

Inventions I and II or I and III are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as the specific writing operation claimed in Group II or the specific erasing operation as claimed in Group III.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications and the search required for invention I is not for invention II or III, restriction for examination purposes as indicated is proper.
